LINER REPLACEMENT CONTRACT

Tom Gaudet Construction Corp. will:

1. Remove existing liner from pool, bag it, and place in customer's recycle area or trash pick-up area. We may be able to remove from site for a fee if we have room in van.
2. Install Gorilla Pads, Rhino Shield, foam cove free of charge. Wall foam will be installed for \$100 fee; you must provide wall foam and adhesive glue spray. Customers concerned about possible liner puncture from rocks, roots, structural steel, burrowing insects, etc. are encouraged to provide these products.
3. Install liner to or above manufacturer's specifications.
4. Provide coping for overlap liners and liner lock for beaded liner as need at no charge.
5. Skim bed of pool to remove existing craters or mounds.
6. Use a vacuum where applicable to remove excess wrinkles from liner during installation.
7. Re-connect all hoses, lights, and alarms that were there when we started the job at no charge.

Tom Gaudet Construction Corp. Will NOT:

1. Wait for more than an inch or two of water to pump out without charging a fee.
2. Be responsible for wrong size or wrong type of liner bought by customer.
3. Be responsible for leaks due to manufacturer's defect (seam separation). However most retailers will provide a new liner at no charge and will cover all or most of the labor fee, provided you find said defect and show to them. Burden of proof is with you. Check with your retailer.
4. Guarantee a wrinkle free or footprint free liner, however we will do everything we can to eliminate both.
5. Be responsible for leaks due to "Acts of God" i.e. fallen trees, ice damage, winter damage, excessive rain or snowfall, high winds, burrowing insects, etc.
6. Be responsible for any damage to pool, liner, or site including dwellings, structurally or cosmetically as the result of filling with water tanker truck or defective parts, including pool, liner, pump and filter.

It is the Customer's responsibility to:

1. Make sure the pool is empty when we arrive. A puddle or two is fine. 8" is not fine. 600lbs of wet leaves is not fine. Puncture liner when down to last few inches when draining. Any remaining water will soak into ground. Any rain will soak into ground. Wet leaves will dry.
2. Provide the correct size, shape, and type of liner and have it easily accessible at the time of installation.
3. Provide a new water tight skimmer and return assembly. I cannot guarantee your old skimmer. There will be a service call fee to come back out and replace skimmer. You will also have to drain pool below return level.
4. Provide a "live" electrical source to plug our tools into.
5. Provide a water source with enough garden hose to reach the pool. Collapsible hoses are no good. Severe leak at house, BAD.
6. Let us know if your pool has a deeper middle or deck around any or all of the pool. We need to know if it is a factory bought deck(steel) or a custom made deck (wood). There may be an additional charge if the middle is deeper (more time needed to fill with water and remove wrinkles). If the deck on the pool prevents us from easily disassembling the top of the pool (if necessary), there may be an addition fee.
7. Fill the pool with 12-18" of water immediately. THEN STOP FILLING. Allow 24-48 hrs (depending on temperature and sunshine) for liner to stretch before filling completely. Water tanker trucks can be scheduled after liner has stretched.
8. Know the retailer's and/or manufacturer's policy regarding defective liners and in the unlikely event that the liner is defective, it is the customer's responsibility to locate said defect and get replacement liner. I will provide labor to install the new liner at no cost to you.
9. Have payment ready when job is completed. Personal check accepted for initial deposit only. Final payment must be cash, bank check, or money order.
